

Windows Security made Simple!

WINLOCK 7™

With WinLock 7™ you can look forward to an easier IT life

Like most Organisations, you will have suffered from innocent meddlers or inexperienced users corrupting or altering your PCs. Until now your only answer was to probably spend a vast amount of time and effort fixing them, but with WinLock 7™ your IT life is sure to get a lot less complicated

WinLock 7™ is the number one windows security product, developed and upgraded since 1996 and used by 50,000 plus organisations world wide. It includes a host of features that's sure to save you time, effort and money.

Now on version 7 it offers security for both standalone and networked PCs and comes with 100s of useful security features.

It's totally compatible with windows 95/98/NT and XP and it has the facility to incorporate new restrictions as and when available.

It really is simple to deploy yet comprehensive enough to eliminate hours and hours of downtime, frustration, headaches and worse.

WinLock 7™ will ensure your PCs are protected and any innocent or malicious act prevented will make it money well spent.

Using an intuitive start-up wizard you can glide through basic to sophisticated PC security in just seconds whether protecting an entire network or just standalone PCs.

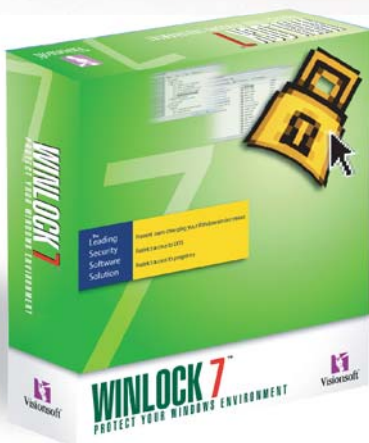

From a simple security wizard you can:-

- Stop hundreds of damaging PC setup changes
- Incorporate hundreds of additional restrictions
- Add MSN, Internet Explorer & specific program restrictions
- Reduce downtime in just seconds

Just imagine what you could do with your time if you weren't constantly sorting out needless problems, not to mention the increase in staff productivity & moral.

- Easy to setup & use
- Simple to deploy
- Full Help & Wizards included
- Fully Supported
- The Original PC Security

WinLock 7

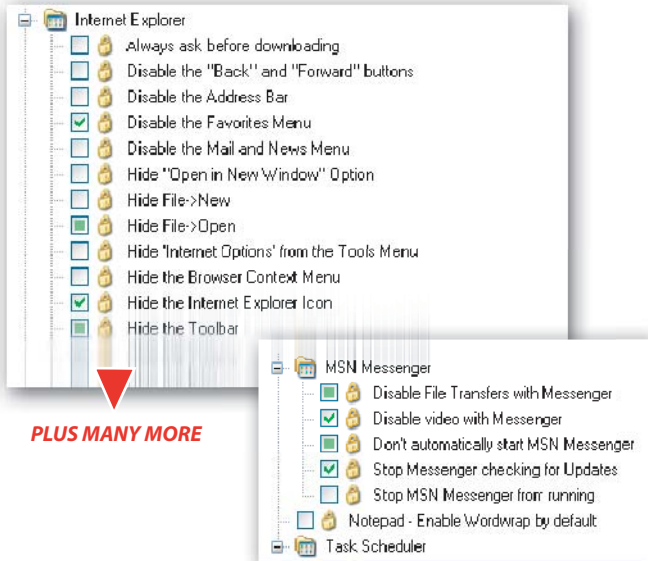

Technical data

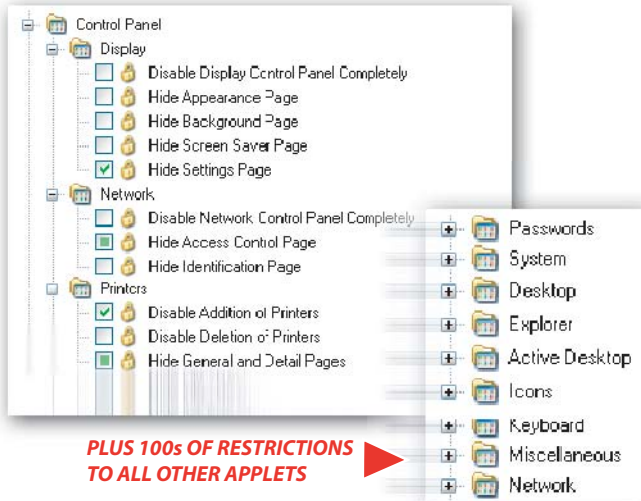

WinLock 7™ incorporates hundreds of security features that are simple to implement and can be assigned to any PC or user.

WinLock 7™ is not just another Policy Editor - it's fully network compatible and offers the ability to setup security templates per user and or group of users from an easy to use Interface. It is also fully supported by Visionsoft.

With WinLock 7™ you can easily add application based restrictions:-

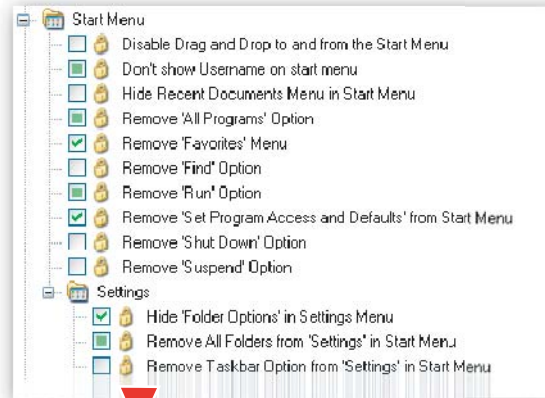

You can also implement control panel applet restrictions in seconds just like these-

Its future proof too! Teach WinLock 7™ more restrictions as and when available or with new operating systems by simply editing the restrictions data. It couldn't be simpler!

You can also protect your windows wallpaper, disable windows safe mode on 9x PCs, stop F5 and F8 from bypassing system startup and clear contents of documents and add Start Menu restrictions like:-

PLUS MUCH, MUCH MORE...

Look at the benefits:-

- ◆ Centralise control. View, modify and implement your security from a central location
- ◆ Operating system specific control panel protection
- ◆ Easily learn & protect third party control panel applets
- ◆ Apply your security plan instantly
- ◆ Rapidly alter the access rights for any number of user
- ◆ Build complex security templates quickly and simply
- ◆ Stay informed, monitor progress of implementation

You really will wonder how you ever managed without it!
